Product Catalogue 2009

Introducing an exciting, revolutionary range
of urban furniture for the 21st century

introducingurbanscape

"The most important people we know – our customers have increased in their numbers over the years, and we're confident that their ranks will expand even further during 2009. What makes us so sure is that the four cornerstones of our business – innovation, pride, quality and style, will always meet the new demands for enhancing public spaces."

Urbanscape accept all major credit and debit cards:

urbanfurnitureformodernliving

If you're looking for inspiration, it's here – with products packed with practicality and versatility. Add to this exceptional service, delivered with pride, and it's easy to see why Urbanscape remain as first choice for improving the public and civic environment.

Take a Seat – In a Clean Environment

Helping our customers to provide a relaxed, pristine and stylish outdoor environment is an important part of Urbanscape's commitment. That's why we've developed such a wide variety of seating – our attractive bench models, such as the Carsington, Chatsworth, Haddon and Brunel ranges, are all designed to upgrade and enhance public spaces and individual sites. These are fully complemented by an exceptional choice of litter bins to match any requirement – from double-skinned and single skinned models to steel bins, grit bins and those all-important dog waste bins – and we're proud of our bespoke litter bins. Just give us your specifications, and we'll come up with exactly what you need. These are just a few examples of how we're always in the vanguard of new developments.

As the population begins to experience an increasing enjoyment in their civic public spaces, our new and increasing ranges of quality street furniture will continue to expand. As ever, Urbanscape's mission is to continue to present a sense of style and panache with all our British-made products – always the best, always the most competitively priced.

You'll see what we mean by browsing through these pages, but always remember – if what you're searching for isn't here, let us know and we'll find it. Tell us the time, and the place – and it'll be there!

cigarette disposal bin

a definite must for no smoking areas

Giving Benefits

- ✓ Non-corrosive
- ✓ Easy installation
- ✓ Tough anti-failure lock
- ✓ No maintenance needed

Urbanscape manufacture a range of hard-wearing Cigarette Disposal Bins specifically designed to combat the increased problem of cigarette litter in our urban environment.

If you have a **NO SMOKING** policy you will need one of these...

USL-Cigarette Disposal range

Ideal for use inside or outside your no smoking office, no smoking factory, no smoking pub, no smoking hotel, designated smoking area or no smoking restaurant. Prevents unsightly littering and ash dirt associated with cigarette butts, outside the entrance door to your premises.

The USL-Cigarette Disposal range is fitted with an anti-failure lock system, making it clean and easy to empty.

What do I do checklist

Employers, managers and those in charge of smoke-free premises and vehicles will need to:

- **Display 'no smoking' signs in smoke-free premises**
- **Take reasonable steps to ensure that staff, customers/members and visitors are aware that premises and vehicles are legally required to be smoke free**
- **Ensure that no one smokes in smoke-free premises or vehicles**

cigarette disposal bin

a warm welcome awaits smokers and non-smokers alike

filthy facts:

IF EVERY SMOKER DROPPED ONE CIGARETTE BUTT EACH WEEK IN THE UK, WE WOULD BE KNEE DEEP IN MORE THAN 624 MILLION CIGARETTE ENDS WITHIN A YEAR

AN ESTIMATED 122 TONS OF CIGARETTE BUTTS AND CIGARETTE-RELATED LITTER IS DROPPED EVERY DAY ACROSS THE UK

OVER 90% OF ENGLAND'S STREETS ARE BUGHTED WITH CIGARETTE ENDS, CIGARETTE PACKETS AND MATCHES

CARELESS SMOKING IS ESTIMATED TO BE THE NUMBER ONE CAUSE OF FIRE RELATED DEATH AND INJURY IN THE UK

Embassy - Robust wall or post mounted Cigarette Bin to keep areas clean of cigarette ends and cigarette ash.

cigarette disposal bin

a definite must for no smoking areas

Urbanscape floor standing cigarette bins are stylish, functional and are easily fixed to the floor for public areas where a wall mounted unit cannot be used.

The Urbanscape Nubber stands 870mm high and has a massive capacity and as you can see, can be easily emptied with out the need to touch those filthy nubs.

The Urbanscape Freestand has been developed with all our other wall mounted cigarette bins in mind. Choose the cigarette bin you would like then just add the versatile Freestand. Easy as that, good job well done.

The Freestand is 1300mm high and like the Nubber is easily fixed to the floor.

US-Nubber

With convenient access for easy waste disposal

US-Nubber

US-Freestand

cigarette bansigns

legally required no smoking signs - ensure you comply

Avoid possible fines by displaying Smoking Ban compliant signage. All Urbanscape signs are compliant with Smoking Ban legislation.

Use cigarette ban signs to assist your implementation of the smoking ban. Available in 3 materials: self-adhesive vinyl for indoor use. 2mm rigid plastic for outdoor use - fixings required, and self-adhesive Rigid Plastic for use on any smooth indoor surface or company vehicles.

All signs are available in 3 standard sizes:

A5 – 210 (H) x 148mm (W), A4 – 297 (H) x 210mm (W), A3 – 420 (H) x 297mm (W)

No smoking

You are entering a no smoking zone

No smoking. It is against the law to smoke in these premises

Smoking is not permitted on these premises

No smoking. It is against the law to smoke in these premises except in a designated room

No smoking

This a no smoking vehicle:
Double Sided Vehicle Label

Brushed Steel Plaques

The NEW brushed steel plaques are ideal for pubs, clubs, hotels and restaurants giving your establishment a more 'classy' feel.

Also available in various text options on request.

litterdisposal

stylish, contemporary and superbly practical

Giving Benefits

- ✓ Durable
- ✓ Rugged construction
- ✓ Ideal for logos/crests
- ✓ Choice of colours

There's nothing humble about a practical Urbanscape litter bin or waste disposal receptacle. We believe in style – we want pride on your high street, and our designs inspire it.

The USL 100 range: the ultimate solution to litter disposal. Durable, rugged construction, packed with customising possibilities, with an optional front plate to display your logo. Matching your corporate identity is no problem – the range comes in an excellent variety of colours.

Maybe you have design initiatives beyond our innovative bins. Our bespoke service welcomes your ideas – whatever you're looking for, call us – we'll put your potential to work.

doggydoobin

ideal for parks and open spaces

Giving Benefits

- ✓ Tough and durable
- ✓ Easily installed
- ✓ Ideal for logos
- ✓ Choice of colours

We all love man's best friend, so when nature calls responsibility's the answer – and that means Urbanscape's new USL-Doo 50 dog waste bin.

It's perfect for town centres, open spaces and parks, with a large capacity chute for easy waste disposal.

USL-Doo 50

It's as tough and durable as they come, it'll defeat the vandals and with it's permanent surface there's no painting to bother about.

Installing in soft ground presents no problems – forget concrete or digging. With its hard-gripping urbanscape Terra-Lock®, the USL-Doo 50 stays put, and it's easy to re-site the bin when the barb is retracted.

It comes with an option for a steel liner or a sack retention system.

Colour specifications

Standard colours

These maintenance – free products have their solid body colour permanently moulded in. They can be supplied in non-standard colours matching the following systems:

NCS-Natural Color System® is an international colour standard for specifiers, manufacturers and industry. Widely used for coatings, laminates, cladding, etc.

The Munsell Colour-Order System® is a way of precisely specifying colours and showing the relationships among colours, establishing numerical scales with visually uniform steps for each of colour's attributes.

The AAL DESIGN System has been developed for professional colour design. It contains 1688 colors arranged in a systematical order.

Pantone® is the world-renowned authority on colour and provider of colour systems and leading technology for the selection and accurate communication of colour.

rotational moulded bollards

available in a range of 4 ground fixing options

SOCKETED

Bollard removal and replacement? 4 Easy Stages!

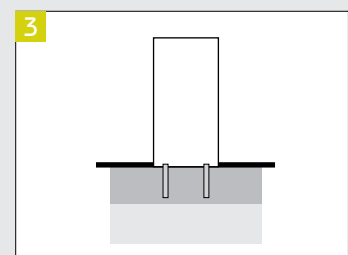

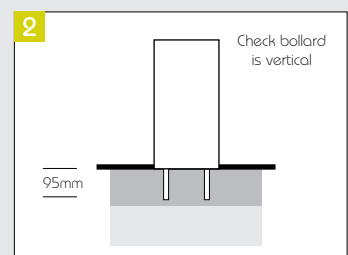

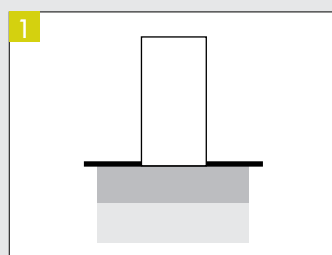

1. Dig the right sized hole to match your bollard. Bed it with type 1 infill, and make sure that the top of the socket levels with the final ground level.
2. Using concrete mix, part-fill the hold around the socket, into which you now place the bollard. Lock it by twisting clockwise.
3. Add more concrete until 100mm below final ground level. Using the key provided, unlock the bollard and take it from the socket whilst waiting for the concrete to cure.
4. Complete the hole to final ground level, replace the bollard and lock it to the socket.

SURFACE

Bridges, parks or multi-storey car parks may have vulnerable below-ground surfaces. In this event the bollard is fixed with 95mm expanding bolts using a shallow concrete substrate.

1. Place your bollard in position. If it's fitted with reflective banding, make sure it can be viewed in the traffic flow - red on the left hand roadside, white on the right.
2. Use a masonry drill whilst the bollard's in position and mark the 4 bolt positions on the wearing surface; remove the bollard, drill your holes.
3. Position the bollard again, then through the base, place the expanding bolts into your drilled holes and tighten them.

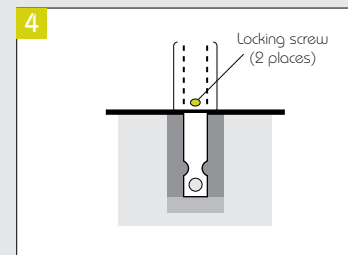

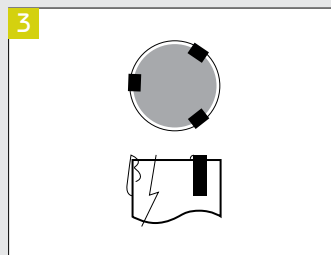

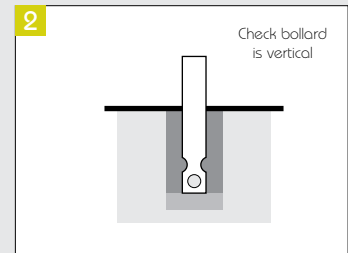

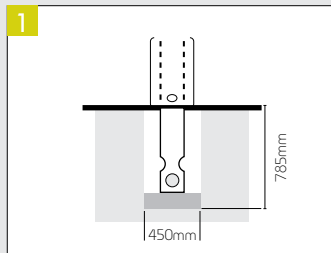

rotational moulded bollards

available in a range of 4 ground fixing options

ANTI-RAM

It's immovable - solidly concreted into the ground, a rugged steel core will give any potential ram-raider a nasty shock.

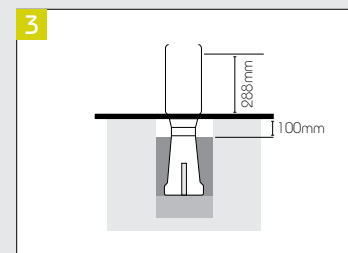

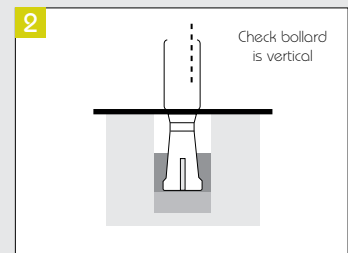

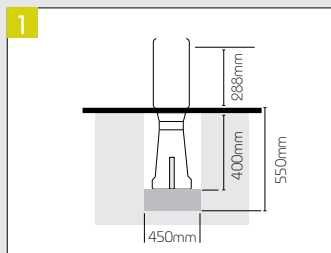

1. Once you've dug the correct-sized hole and bedded it with Type 1 infill, onto your compacted hardcore you sit the steel tube. To check that your bollard is flush with ground level, slide it over the tube.
2. Use concrete mix to fill the hole around the steel tube - make sure that the concrete penetrates the holes to enter the tube.
3. Take the three provided spring clips and space them equally around the top edge of the tube.
4. Slide the bollard over the tube. To fit the locking screw, simply drill a hole through the tube, place the screw and tighten it. Fit the supplied blanking cap and repeat these stages for the other screw port.

PERMANENT

For a bollard which can't be removed, the base is concreted below ground, with the moulded return and the base ensuring permanent fixing.

1. Bed your correct sized hole with Type 1 infill and make sure that your bollard plinth base is at final ground level.
2. For a bollard fitted with reflective banding, make sure it can be viewed in the traffic flow - red on the left hand roadside, white on the right. Use concrete mix to part-fill the hole.
3. Add more concrete to 100mm below final ground level. Once your concrete has cured, make good to final ground level.

rotational moulded bollards

materials & properties

Reflective Materials – For improved bollard visibility, Engineering Grade, High Intensity and Diamond Grades are all available, so both bollards and bins can be customised to your choice of reflective properties.

Recycling – The Environment Agency's accredited standards can be met with our 100% recyclable polyethylene – and we can offer further environmentally friendly products in 100% post-consumer recycle.

Colour Specification – You've a wide choice of colours for products using all the accredited colour systems, including NCS-Natural Color System®© theRAL Design system The Munsell Colour-Order System® Pantone®

Durability – Impact-resistant, ruggedly tough and durable moulded polyethylene is shatterproof and strong against any fracture, it's mechanical properties Tested to BS 2782.

Maintenance Free – No painting to worry about – the permanent solid body colour is moulded in. Resistance against wear and tear leaves scrapes from vehicles or scratches unnoticed.

All Weather Resistance – Weather in the Northern Hemisphere is demanding – but polyethylene can stand up to all the elements.

Cleaning – It's easy – a flush over with clean water followed by a solution using mild detergent. Taking care not to use too much pressure, carefully use a bristle brush or sponge to avoid damaging labels, then another flush with water – job done!

Resistance to Chemicals – PE can't be corroded by diesel fumes, acid rain, soot, seawater or salt. Polyethylene resists them all.

Manufacturing Standard – All products are manufactured to BS EN ISO 9002, and mechanical properties of plastic products to BS 2782. Zinc coated: BS 1706, Powder coated: BS 3900, and hot dipped galvanised to BS 729.

rotational moulded bollards

materials & properties

Urbanscape's Rotational Moulded Bollards

have many remarkable properties with a truly wide range of applications.

Wherever there's a high standard to aim for, we'll reach it, to provide the best possible product to enhance any chosen location.

Every aspect is covered, including strength, durability and absolute weather resistance. These products are the result of years of research and development to achieve the ultimate in practical functional street furniture which is easy to maintain and simple to install or re-locate – and the environmental options such as re-cycling are a very important 21st century element which takes pride of place in our design.

If a custom made scheme is required see our bespoke services on pages 64 & 65

Reflective Properties

	Description	Applications	Benefits
Engineering Grade	Meets requirements of BS:873 Part 6 (Class 2 signs) with Enclosed lens retro-reflective sheeting	General signage including permanent road traffic signs, street nameplates and emblems	Impressive reflective performance – easily legible and bright 24 hours per day, with a performance life of 7 years
High Intensity	Meets requirements of BS:873 Part 6 (Class 2 signs) with Encapsulated lens retro-reflective sheeting	General signage including permanent road traffic signs, street nameplates and emblems	Impressive reflective performance – 3.5 times brighter than Engineering Grade (Class 2), with an effective performance life of 10 years
Diamond Grade	Highly retro-reflective sheeting provides. Visual Impact Performance	Ideal for road traffic signs with short to medium viewing distances – especially in areas where high ambient background lighting is prevalent	Offers a reflective performance approximately 3 times brighter than High Intensity (Class 1), with a 12 year effective performance life providing excellent daytime colour definition and exceptionally high night-time brightness

pubollards

ideally suited to today's urban environment

Giving Benefits

- ✓ Durable
- ✓ Colour stability
- ✓ Simple installation
- ✓ No residual value

Cast iron bollards are rapidly giving way to a new generation of robust, ruggedly constructed PU bollards. Their tough durability is just what's needed in the modern urban landscape. Just check out the advantages these Polyurethane Elastomer have to offer and you'll see why they're streets ahead of the old traditional bollards.

classicbollards

your imagination + our inspiration: result? innovation!

Urbanscape's inventive capacity knows no bounds – whatever your budget, we've built a product range to match – plus a reputation for innovation...

Our products provide decoration – and security. Whatever you're searching for, we have it – if not, anything's possible – we'll find it! Maybe you have a bollard in mind made in a specific material. It doesn't have to remain a vague idea – Urbanscape deals in reality. All we need is a drawing or a rough sketch. Let us develop the product – just leave everything to us.

Low maintenance is the key today. We're ahead of the game with a contemporary blend of style and security, with minimum maintenance. Perhaps you're looking for decorative durability – and that means our range of steel bollards – will last.

There's a variety of head materials and shapes on offer. Timber heads can be in Iroko with an oiled finish. The square head is also available as an aluminium casting which can be powder-coated in a clear or coloured finish.

Square cast heads can have 24mm diameter rope or 44 diameter aluminium rails attached using fixing plates. Other options on the heads include the integration of traffic signs.

Fixing the bollards to the ground is easy. Expansion bolts can be used with a plate welded to the tube for fixing to concrete surfaces. The surface fixed option has a cast collar which hides the fixings, and this is available in clear or coloured powder coat finish.

seating

the urbanscape seating range just got bigger... and better!

Good seating in an urban environment is a civilised hallmark of any welcoming town centre or public space. Urbanscape have put a lot of thought into this important subject to come up with designs which embody all the qualities you'll need; style, durability, and above all, comfort.

USWP-S1250

seating

the urbanscape seating range just got bigger... and better!

As you can see, our expanded range of benches and seats are made to suit any environment. We've sought out the best timbers, the finest stainless steel and aluminium, and incorporated these into a superb selection of designs.

USWPS

There's a welcoming, traditional feel to our wholesome wooden planter seats where you can be as close as you wish to those attractive floral displays.

With hardy timbers to survive the seasons, rugged steel fixings and frames and tamper-free screws, an Urbanscape bench is the best place ever to pause and watch the world go by...

seating: the classique range

simplicity with a hint of continent

Beauty, rugged elegance and comfort means the Classique bench. With smart, shiny cast aluminium legs, feet and framing for extra strength, and tamper-free fixing bolts, this is the crème de la crème of civic seating.

The Classique Range
Timber slatted seat with extruded polished aluminium framework

the buster range

hard-wearing and functional - in buster we trust!

You can trust a Buster! The backrest can be removed to form a backless bench, and the multi-metal tubular legs and optional oil-finished Iroko timber give this inviting bench a hard-wearing functionality which graces any public area.

The Buster Range
Timber slatted seat with wide tubular multi-metal legs (backrest optional)

seating:therhinorange

robust simplicity

The Rhino Range
Robust steel bench

Put it anywhere and this tough, simply-designed bench can only enhance the environment. This is a quality bench built to last, as strong and robust as they come.

thenauticarange

simple style and functionality

With optional straight or graceful curved contours, the enticing Nautica bench is a unique focus of style and design. The powder-coated, steel end supports can be supplied in your chosen colour adding an attractive seating arrangement to any public area.

The Nautica Range
Contoured timber top with powder-coated corrugated steel support

seating:theenviorange

furniture to match your flowers and decorative planters

The Environ Range
Timber slatted seat with tubular powder coated stainless steel legs

Everyone will want to rest a while on this attractive, timber slatted seat. The strong, steel legs are powder-coated, painted in the colour of your choice – with a unique feature – by removing the grub screws on the feet you can fit your own crest or logo.

seating:thecarsingtonrange

warm wood, comfort and strength

The Carsington Range

Sturdy, modern lines with the comforting warmth of wood make the Carsington Range a restful focus in any public space. The graceful sides and supports are powder-coated in black making this the ideal seat to take the weight from weary feet.

seating:thechatsworthrange

elegance, durability and restful appeal

The Chatsworth Range

With its familiar, traditional feel the Chatsworth Range has an elegance all of its own.

Strength, durability and a relaxing appeal can be combined here with your choice of powder-coated colour, all of which provides an excellent seat on which to unwind.

seating: the haddon range

a seat and a bench with strength and style

The Haddon Range

Innovative design imbues the Haddon Range of a vigorous sense of strength, and with its attractive, supplementary bench following the same creative features, with your choice of powder-coated colour. This is seating with style, enough to attract any pedestrian in need of a break.

seating:thebrunelrange

traditional comfort, ultimate relaxation

The Brunel Range

Echoes of sophisticated engineering provide the Brunel Range with a consoling sense of time-honoured comfort with a design featuring steadfast embellishments which hark back to a more relaxed age. This fine seat and its attractive accompanying bench will add grace to any public space.

picnicbenches

durable al fresco dining

The quality of some Al Fresco furniture leaves a lot to be desired. That's why Urbanscape have yet again gone back to the drawing board to come up with benches which not only double the pleasure of a picnic – they also stand up against the demanding weather conditions you can expect in the Northern hemisphere.

So forget warping, loose joints, rickety fixings and moss, these are picnic benches and tables built for both comfort and durability. Our selection of three picnic bench units are as tough and solid as they come – better still, they're a solid investment.

- Choice of rugged, treated hardwood traditional styling, looks good, feels good and easy to maintain
- Steel versions are virtually indestructible, weather resistant and available in galvanised powder coating
- All benches are made to accommodate wheel chairs
- All benches can be made smaller for children's seating

Traveller's Rest
Hardy steel bench, galvanised with choice of powder-coated colours

Information on the wide colour spectrum can be found on page 31

picnicbenches

ideal for the great outdoors

The Al Fresco

Galvanised steel, choice of powder coated colours plus maximum stability with 'A' frame design

The Woodsman

Solid, warm treated hardwood with 'A' frame design – a tough piece of outdoor tradition

urbanscapeterra-lock®

easy to install, easy to remove

The original Terra-Lock® has been used by many organisations, including local authorities, forestry enterprises and well established companies in the civil and security sectors. The applications have varied from litter bins and signs to security applications.

The URBANSCAPE Terra-Lock® Ground Anchor

Ramrod

Fourteen kilograms in weight that delivers an impact sufficient to drive the Terra-Lock® into the most difficult of ground conditions. The ring on the ramrod strikes the top of the anchor and drives it in.

Bin Adaptor

Designed to enable the Urbanscape bin to be fitted to the post of the anchor or directly onto a wall.

Box Spanner

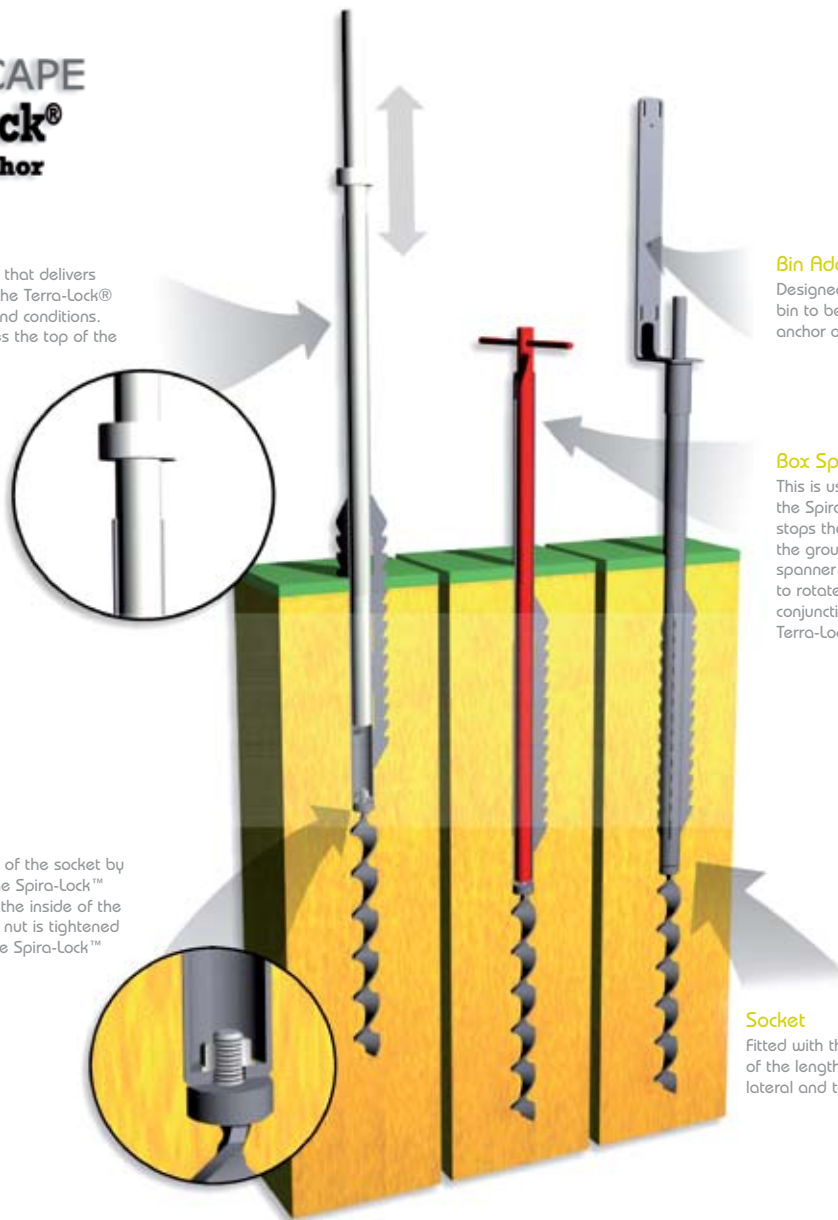

This is used for tightening the M16 nut to lock the Spira-Lock and prevent it from rotating, which stops the Terra-Lock® from coming back out of the ground. To remove the anchor, use the box spanner to loosen the nut to allow the Spira-Lock to rotate freely. The ramrod can then be used in conjunction with the box spanner to remove the Terra-Lock®.

Spira-Lock

This is fixed to the bottom of the socket by way of an M16 stud on the Spira-Lock™ and a nut and washer on the inside of the socket. For installation the nut is tightened sufficiently to just allow the Spira-Lock™ to rotate on the socket.

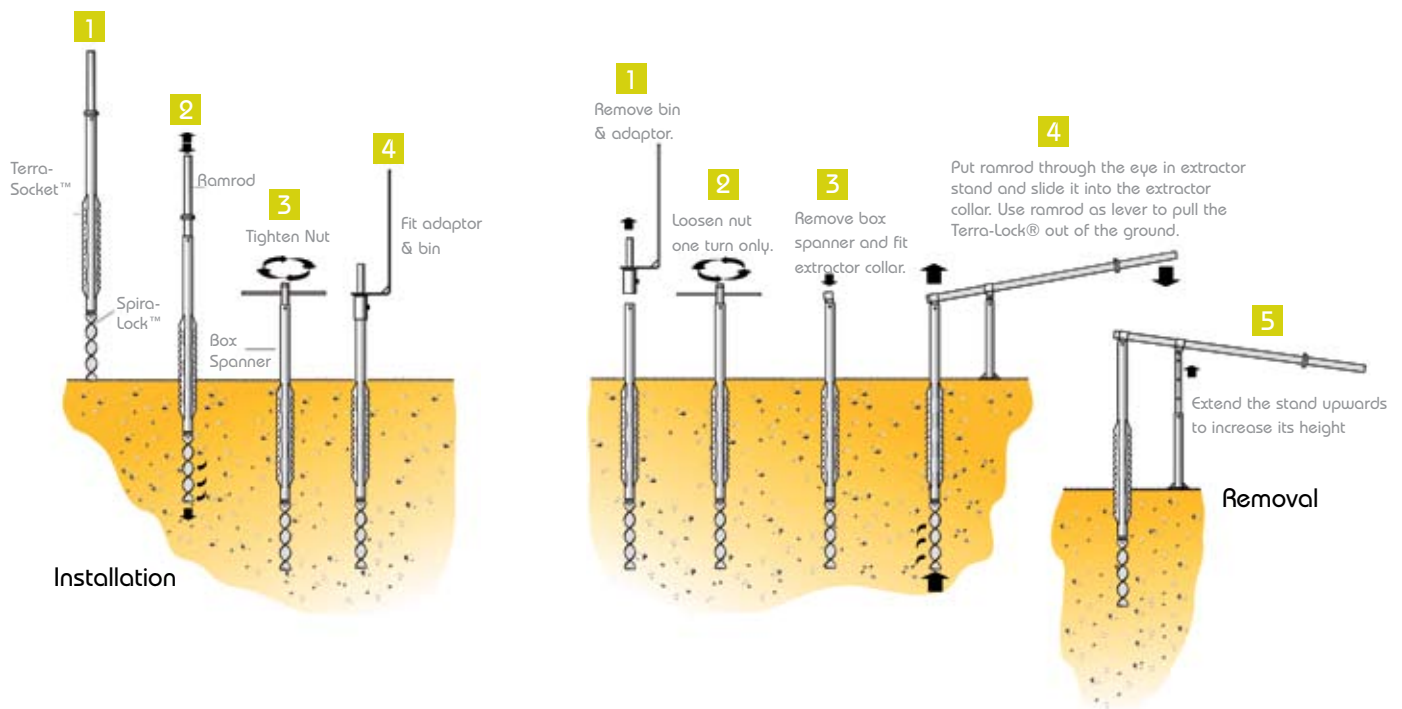

Socket

Fitted with three stabilising fins that run most of the length of the socket, they provide good lateral and torsional stability.

urbanscapeterra-lock®

easy to install, easy to remove

pointsofinterest

- Easy to install, copes with even the most difficult conditions
- Reusable, environmentally friendly and a cost effective alternative to concrete
- Secure, anchor released by use of the box spanner only
- Penetrates most ground conditions including bricks, tree roots and small stones
- Provides good vertical and lateral support
- Heat treated for added strength & corrosion resistance

Urbanscape Terra-Lock® ground anchors can be used for applications such as signs, floor and post mounted litter bins, flagpoles, scaffold type structures where anchoring is required.

The anchors can be fitted with many ancillary items such as steel posts, both square and round, large base plates to take ground mounted items, proprietary adaptors for tubular structures and for shackles. We can also supply sockets designed to take a variety of timber sections for outdoor play equipment.

We can tailor these anchors to suit many individual applications. Should you have such a requirement then please call us and we would be happy to discuss them with you.

flagsandbanners

a popular addition for your big occasion

Unfurl the flags! Here's a new and exciting service from Urbanscape. Flags and banners have been popular throughout Europe for centuries to add a memorable visual splendour for special occasions, festivals and events throughout the year.

Flag and banner poles are now becoming increasingly widespread for this purpose throughout Britain, and Urbanscape can now supply you not only with a colourful range of flags to order, but we can design, manufacture and deliver any banner you need for your big occasion.

Not only will we make them for you, and provide the poles and fittings – we'll even put out the flags on your behalf. Just call us with your requirements, and our team will get to work.

Urbanscape have several flexible ways of providing our banner service.

- We can simply sell you banners and fixings
- Produce artwork, banners, install and remove them to your schedules
- Offer a complete service for a programme of events throughout the year

Which ever way you wish to operate our flags and banners service offers a cost effective one stop shop solution to your problem.

Infosites Information for the public

Inform and advertise with Infosites!

Infosites are made from vandal resistant moulded polyethylene, They are mobile attractive and safe. Infosites are a fantastic way to inform the public of maps, events and notices.

There are three options for using Infosites

- Outright purchase the site and graphics from Urbanscape
- Rental from Urbanscape including installation of the module and a programme of replacement graphics
- As a revenue stream. Urbanscape will install each module at no cost and sell the advertising space. Urbanscape will then repay a percentage of the revenue direct to you

Whatever requirements you have for our Infosites... Urbanscape can offer you a flexible simple and hassle free service.

summary

the very best in 21st century urban furniture – and service!

Urbanscape's growing success in providing new, exciting and contemporary urban furniture products is the result of several elements. One is our feeling for innovation and our constant desire to come up with ideas which improve the environment we all share.

We take into account all those factors which public and corporate organisations are searching for; safety, durability, economy, choice and good design.

Urbanscape continues to forge successfully ahead by seeking out the best new ideas to incorporate into our impressive range of urban furniture. Wherever there's a new innovation to enhance the environment we're onto it – we want you, our customers, to share in our enthusiasm. Safety, durability, economy, choice and good design are all elements both public and corporate organisations aspire to – and that's exactly what we supply.

It's your valuable feedback which keeps us on our toes and ahead of the game. We'll take all the time that's needed to meet our clients and, most importantly – to listen. Urbanscape's team are the most observant in the business – if there's any way we can see a potential improvement in the way your town

centre, public areas or corporate workplace looks, we'll take that idea onto the drawing board and, with your requirements in mind, we'll come up with something new and exciting.

We dedicate ourselves to excellent service. Once your order is placed, we'll never keep you waiting. In a tough, competitive world we're proud to be able to offer a service few can rival – and that's something we're extremely proud of.

So here it is, 68 pages of some of the very best urban furnishings in Europe, chosen and designed with care and attention. Our picnic furniture and seating range is one of the best available. Our litter bins, dog bins and grit bins will admirably complement any public area, All our metal and wood products, from classic bollards to our modular bollards and signage products are the result of careful and inventive thinking – all inspired by you - our customers.

Have browse through the catalogue and never forget - if what you need isn't in these pages, pick up the phone or drop us an e-mail – whatever it is, we'll make it!

peripherals

litter picking made easy

Litter – it’s a nasty habit, but because some folks drop their rubbish then someone has to pick it up. With a good pair of Urbanscape pincers, the task is easier with little bending or back-stretching.

Urbanscape’s strong and practical range of pincers offer the twin benefits of hygiene and total ease of operation. You can ferret out that obstinate bit of litter in the most awkward of places.

USL-EH

- Lightweight sturdy construction
- Smooth, easily operated trigger-grip handle
- Perfect in tight corners or flower beds
- Flexible rubber pincer tips
- 500m, 650mm, or 800mm long

The convenient pads on the pincer ends firmly grip any debris you wish to remove, and respond easily to the smooth trigger-grip action of the handle.

peripherals

litter picking made easy

Wide gripping capability
Handles cans, bottles with ease

Small Items easily removed
Everything, right down to a cigarette end

Safe, hygienic litter handling
Ideal for safe removal of unpleasant debris

Strong easy grip operation
Smooth grip action handle

These Urbanscape Pincers come in three length sizes and are perfect for reaching into the most awkward places. You'll soon get to grips with any litter, from a cigarette butt to a can or a plastic bottle, with the added bonus that your operative will be keeping all the nastiness well beyond arm's length.

The wide jaws on the pincers are easy to operate using the smooth-action grip handle.
